Medium Is Seized During Materialization Seance and With Wife Is Booked For Violating City Ordinance

Wild Dash For Liberty Made By J. J. Dickson While in Spectral Array When His Act Is Spoiled By Raid

Ghosto walked in Oakland last

Eyes stared through the gloom of a darkened room. A white, phosphorescent form

materialized. A voice from the tomb spoke in sepulchral tones.

Then a pocket light flashed, a lithe figure hurtled toward the ghost in a flying tackle, police whistles shrilled, doors crashed down. women screamed, devotees rushed for the exits, and the ghosts walked no more.

J. J. Dickson, materializing madium, clairvoyant and master of a Psychic Empire all his own, was held in the grip of Officer Clyde Miller with the remnants of his white robe still clinging about him. COUPLE ARRESTED FOR VIOLATING ORDINANCE.

Dickson and his wife, Gertrude, were taken from the seance parlors at 408 Twenty-sixth street to the city prison, where they were lating ordinance 1503 N.S.

Following days of investigation, during which Officer Miller posed as a "sap" and gained admittance to numerous mystic meetings with Dickson, Police Officers Wallace Canning, George Berner and Ira Reedy, in charge of Inspector Robert Tracy, last night raided the "ghost factory."

Under directions from Chief James Drew to clean up the mediums that are said to be operating all over the city, Inspector Robert Tracy, Officer Miller, and a TRIBUNE reporter delved into

the realm of the occult. Dickson operated his spook proeaution, and he required everyone to give account of themselves be fore gaining admittance. Through a ruse Officer Miller, with witnesses, attended the meetings on the second floor of the Twentysixth street house, and tried to get in touch with his soldier pal, Robert, who had been killed in the Argonne. At these public meetings were held on Wednesday and Sunday nights the charge for admittance was nity cents.

In order to place Officer Miller en rapport with his dead buddy, the medium advised the policeman to attend private seances where the charge was \$1.50, with the idea of developing his paychic personality to the extent that he could hear voices from the other world and see the spirit forms that were hovering over his head.

Last night the hero of the Argonne came wafting down to earth and spoke in a hoarse whisper to Officer Miller of his death upon the battlefield. Just as the ghost came to a thrilling part of his narrative, Officer Miller decided to embrace him. The policeman leaped suddenly forward, throwing his flashlight full in the face of the alleged soldier spirit, and he caught the MEDIUM DIVES

It is the opinion of both officials that the rapid transit services proposed would not pay for the additional expense at the outset.

The extension into Hayward means a much larger expenditure of money; a sum estimated at near \$1,000,000. It was suggested at the meeting that a better service from as far east as Havenscourt can be effected by routing local Southern Pacific cars on that line into the 14th and Franklin street the sole disturbance which marked terminus by way of 7th street and

Robinson, in opening the meeting, directed attention to the fact and armed the bloody Turk and portation between Berkeley and helped him kill all Christians in Oakland and between downtown Asia Minor, against her promise to Oakland and San Leandro and liberate those people," said the Hayward had been a matter of agitation over a considerable period of years, and that recent rapid growth of outlying districts now makes some solution imperative.

"The growth of Oakland and Berkeley and the suburbs of these two towns has been very rapid within the last few years," said Robinson. "This fact makes the question of rapid transportation an our communities are to prosper we should make itas easy for the resother part of the Eastbay section as quickly as is possible. The present conditions work a great hardship on many of those living in the more distant sections.

"The officials of transportation companies should do this, if the results still fall short of the communities' actual necessities, the problem then becomes one for the whole people." Mark Lee, secretary of the Hav-

In a test of direct comparison made last night at Capwells store, before a large audience gathered on the second floor, the New Edison scored

Harvey Hindermyer, the famous concert tenor, sang in direct comparison with the RE-CREATION of his voice by the New Edison. The test was a perfect one

This is the most drastic phonograph test known.

The New Edison's marvelous performance of last night vindicates everything that has been said or claimed for its perfect realism.

Mr. Hindermyer stood on the stage next to a shapely Chippendale cabinet. He began to sing. His clear notes soared over the big improvised auditorium, delighting all.

Halfway through his song he suddenly stopped singing. The New Edison, at his side, took up his song-and continued it alone

The only way the audience could be sure which was singing was by watching Mr. Hindermyer's lips-so exactly like the living voice was the RE-CREATED VOICE.

The Dann trio, instrumentalists, made the same test of comparisons with the RE-CREATIONS of their recorded numbers. Again the same result—there was no difference between the RE-CREATED instrumentations and the numbers as played by the ladies.

Proof was piled upon proof-Evidence was massed on evidence. The end of the concert found the audience delighted with the way the New Edison bore out the test.

Columbia discovers a process which produces records free from objectionable Surface Noise!

AS a phonograph owner you have always been annoyed by the swish and grinding and scratching noises of records. This "surface noise" has been considered impossible to remove. After years of experiment, the Columbia Graphophone Company to-day presents to the world a record that is virtually noiseless.

This record has been made possible by the discovery, in Columbia laboratories, of a process by which we are able to produce a surface material so fine in texture, so marvelously smooth, so free from friction that the phonograph needle travels over it almost inaudibly and with imperceptible wear.

The playing-result from the use of this new material is actually astounding-no other word can describe it. Melody unmarred by penetrating, obtrusive surface sounds, harmony without disconcerting scratch or scrape—think what this means to you and to every phonograph owner in the world.

This is made practical by Columbia's patented laminated, or threeply, construction. The core or centre leaf in Columbia New Process Records, because it is absolutely distinct from the playing surfaces, is made of a harder, more durable substance. Over this rigid backbone are laid the two playing faces made of the new, ultra fine. ultra smooth

This laminated construction gives greatly increased strength and longevity plus the most noiseless surface ever perfected.

The invention of this new process Co.-for it is the genius-creation of Columbia engineers and chemistsmarks the greatest outstanding improvement since the invention of the universally used disc record.

With New Process Columbia Records you get all the real beauty of voice; all the exquisite, delicate tones of the 'cello and the violin! You get loud surface noises. They are never melody uncontaminated by objectionable surface noise that has been cosidered impossible to remove UNTIL COLUMBIA REMOVED IT!

So great is our confidence in the enjoyment New Process Columbia Records provide that we ask you to tear out the list of records in this advertisement, take it to a Columbia Dealer and have him play them! Possibly he can play the same selections by other makers' Each comparison test will be

You will be thrilled by the Columbia reproduction of every note, every inflection; of the most delicate phrasing—shades of harmony exquisitely expressed that have previously been

lôst in surpacê noises: In comparison with ordinary records, as made by other manufacturers, New Process Columbia Records will prove immediately preferable.

No other record can be like New Process Columbia Records. No one can produce anything even resembling them, for they are fully protected by

In no other record can you get the record by the Columbia Graphophone same wonderful degree of surface quietness and pure, uninterrupted music, for the simple reason that Columbia alone possesses the secret of making a material which, employed as a surface for phonograph records, obliterates obnoxious and intrusive surface sounds.

This new substance does not hush created. Surface noise is merely friction the point of the needle grinding on microscopic roughness and multi-nied by the sensitive reproducer. In New Process Columbia Records this . microscopic roughness is refined away till friction is almost a fiction.

With new and unbelievably quiet playing surfaces, the dream of making the phonograph a musical instrument of the highest and purest type has become a reality!

has solved the whole question! Reproduction of music has now entered a new and greater phase! To-day, the phonograph with the New Process Columbia Records is a masterful triumph. You can now buy Columbia New Process Records from any Columbia Dealer.

Go hear these Columbia Records! Take this list with you! Note the smoothness and fullness of Columbia tone! Note the beauty of expression! Note the seeming presence of the actual voice or instrument! GO hear these records to-day.

"Sure as Shootin'!"

WHEN the season opens, the sportsman's car seems to sense his eagerness for the great outdoors. It roars up the mountain grades—full of newer and non-hitting on every cylin-

der-sure to take him to his favorite haunts. VENTURA Oil in the crank case, and an extra

can under the seat, protects his motor for the long trip. For him, VENTURA, Paraffin-Base Oil means freedom from motor trouble. It is dependable, heat-resisting, faithful in lubrication to the last drop.

For you, VENTURA is the same faithful servant — uniform, economical, dependable — protecting the hot working parts of your motor from wear. Look for the "Red V" sign at garages and service stations, and fill up with VENTURA the next time you drain your crank case.

Wen's Fine Hats

That formerly sold for \$3.00, \$3.50 and \$4. SALE PRICE

Here, men, is the greatest hat opportunity that you have ever been offered. Just think of it, plenty of fine dressy hats to choose from and values worth many times more than we are asking at this ridiculous price of only \$1.95.

A Straight From the Shoulder Talk to the Public!

Ever since the time of his inception over eleven years ago-JIM BALLARD has been the exponent of honest values, and this policy has built his business from a little store in the McDonough Building on Fourteenth Street, back in 1911. It has grown into the present organization of three thriving, busy stores, of which two are located here in Oakland and one in Sacramento. You can TRACE the secret of this progress and permanence back to 1911. When Jim Ballard then started business he DETERMINED an ABSO-LUTELY fair dealing with the public as his first aim. His first advertisement promised "ONE PRICE," "SMALL PROFITS," "COURTEOUS SERVICE." Every customer was to be treated alike, given the best values, and be accorded a hearty welcome. These same principles have controlled the policy of the BAL-LARD STORES ever since. NEVER KNOWINGLY has this institution violated the confidence of the PUBLIC-which accounts for the marvelous strides, the enormous growth, which this organization has attained.

CRIME STUDIES TO PLAY PART IN

Medical and Mental Aspects of Law-Breaking Taken Up at Conference.

The medical and mental aspects of crime; the relation of disease to orime and what measures should taken to stop the expenditure of \$75,000,000 annually in Califor-nia charged against crime, will form the background of a series of remarkable talks at the Municipal

Auditorium tonight.
Dr. Jau Don Ball, noted crim-inologist: August Vollmer, Berkeby's "golden rule" police chief, and Dr. J. V. Breitweiser of the University of California, has arranged the program of talks. Dr. George Ordahl, Dr. Fred Conzilman and Dr. Lee-Stanley are among the speakers.

Henry M. Grant of Oregon State Social Hygiene Society will talk on "Sex Education: What It Is and What It Is Not."

"International Night" will be colebrated in the Auditorium Theater under the direction of J. Fred Anderson, director of Americanization in Oakland's schools. Fiftyseven nationalities will be represented, and the program contains a variety of Spanish, Mexican and Russian dances, besides folk songs and music of all nations. TEST OF CHILDREN.

One of the most interesting features of the big health show is the demonstration of the work of testing the potential capacity of the school age child which has been perfected by Dr. Virgil E.

Would You Do Without It?

Think for a moment how you have learned to depend upon Southern Pacific service.

-how you expect to reach your destination "on the dot"-and do so in a remarkably high percentage of cases.

-how you take for granted the fact that Southern Pacific trains will carry you dependably regardless of rain, sleet, fog or other unfavorable weather conditions.

-how you get trains to take you where you want to go when you want to go.

There you have a picture of some of the fundamentals of Southern Pacific service, that you take for granted.

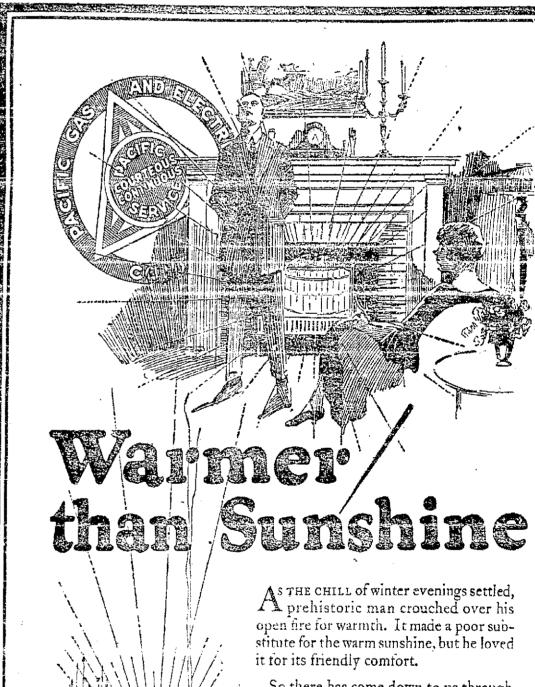

Courtesy-Efficiency

And in addition to providing dependable transportation; the Southern Pacific provides comfortable transportation. Many trains have club, observation and dining cars. Compartments and drawing rooms furnish the privacy which thousands of busy men use for work during trips. Southern Pacific men are "service men." Their first thought is courteous, willing, efficient service. This is your service, made to meet your requirements.

Enjoy its comforts. Profit by its dependability.

true, and Toscano did not have any purchasers for the stock. Chapin declares.

Trial of the case is due to be heard by Judge Dudley Kinsell in a few days, when it is expected revelations concerning the company's stock-selling manipulations will be made.

The concern was organized about a year ago, it is said, by Charles Stewart, the president, and Lawrence Hughes, general manager. These men came to a parting of the ways last March, and the concern was taken over by the creditors, and Lee Landes of Alameda and Chapin placed in charge of the studio, it is said. It is understood they were to produce a picture immediately and pay off the bills, but for some reasons the picture was not produced.

Chapin, Landes and William Bell are now operating the studio under the name "Overland Productions," it is said. KISS GIVEN WITH CROW'S CONSENT, MRS. GRUW SAYS

Wife Files Answer in Divorce Case, Denying Husband's Allegations.

MODESTO, Nov. 22. Ponying tharges of infidelity and intimate relations with R. L. Morris of San Francisco, Mrs. Angelyn H. Crow yesterday filed an answer to the cross complaint of Walter C. Crow, adding another chapter to the sensational divorce case involving the son of a pioneer Crows Landing

Mrs. Crow declares that the relations of Morris with her, as with Crow, have been of a brotherly nature, and with the full knowledge and consent of her husband. Mrs. Crew filed the original suit in Alameda county several months ago, seeking a share of the property she estimated at \$200,000 and alimony of \$500 a month, with \$2000 for counsel fees. The case was transferred here for trial. Crow in his reply placed the value of his property at only \$75,000.

The answer of Mrs. Crow admits that she kissed Morris "in a playful manner" at the dinner table in the Crow home near Newman, but that she had the consent of Crow for

the act. She denies the Hotel Manx affair referred to in Crow's crosscomplaint. Crow alleges that Morris visited her alone in her room

in the hotel.

The Crow's were married in Alameda in March, 1906. Mrs. Crow's divorce complaint asserts Crow refused to take her to places of

MATRIMONY NOR MAIN U. C. AIM, SAYS EDITORIAI

BERKELEY, Nov. 23 -Denial of the frequent accusation that the University is an enlarged matrimonial bureau was made today by R B. Coons, editor of the Daily Canfornian, in the editorial column of the campus paper. Coons not only denies that women come to college for the purpose of enticing desnable men into marriage but goes on to point out the fact that engagement figures among under-graduate students are remarkably low. He says, in part:

"Co-eds of the university often have been accused of having for their main purpose in attending college the view of greater mat-

AN INDUSTRIAL STATE.

The growth of California as an industrial state is to be reflected and recorded in the annual report of the State Labor Commission. There are many persons within its borders who will read with surprise the figures, which point

The country has looked at California as the great agricultural state and quite properly. It is the great agricultural state, one of the most widely diversified crops, of the finest specialization, and of the largest output in many lines. It is a state big enough for all of this, and more.

Louis Bloch, statistician for the Labor Com missioner's office, predicts that within a decade Controlling with the man to be to the design the Already in point of population and value of manufactured products it is the eighth state. In 1899 there were 77.391 wage earners; in 1919, there were 166,468, an increase of 216 per cent. The general rate of population increase for the same period was 133 per cent. In the difference between these two numbers the story is being written.

product jumped 177 per cent.

Here is something of importance to Oakland. It is something we have known, but which will receive a wider recognition with its incorporation in a state report. The value of manufactured products, from 1914 to 1919, increased in the principal California cities as follows:

per cent; San Francisco, 157.1 per cent; San Diego, 124.2 per cent: Sacramento, 1987 They are all enviable records, and Oakland's is twoto-one better than the second best.

The manufacturing importance of this city is reflected again with the announcement that here the percentage of wage earners is larger than in any of the others.

California is becoming an industrial state and not at the cost of her agriculture. Along with the gain in manufacturing goes one in farming. There are acres enough and there will be men enough to make the state lead in both fields.

ISADORA'S HUSBAND.

Excitement attendant upon the arrival of Isadora Duncan, her detention at Ellis Island, and, later, her revelatory dance in Boston, it is to be feared, caused many Americans to pay tra 1244 attention to the highend the highest with her from Russia. Serge Yessenin, for all he speaks no English and must remain silent to the great majority, merits appreciative study. This bashful blonde whose soul, if we are to accept Miss Dáncan's version, met her's in dance, is a leader of the hooligan school of verse in his home land. He is the author of fearful i and extraordinary times which, in the newer manner, are passed as poetry.

Serge must not be allowed to go back home until the American public knows something of what he has written. Students who know of the traditions of Russian literature, of Pushkin and Pet and the others who blended love of country, of man, and the mysticism of broad steppes and white nights, will turn to Serge Yessinin's lines for what is to be learned of the man.

"I am a robber and a serf

Horse-stealer's blood there is in me." So sings the most prominent of the Bolshevist poets, the husband of Isadora. In another place one finds him giving voice to the following unique confession:

"On purpose I march with my hair uncombed, With a head that resembles a kerosene lamp."

It was that head, it is remembered, which was halted near the Statue of Liberty, a head in which the tender subtletries of free verse crowd and shout for expression. Sings Serge: "Today I feel awfully eager

To spit at the moon through my window." There was some wondering when Miss Duncan and her husband were refused admittance to the country pending an intentigation as to I nothing left but a wishbone.

the reasons behind the government's actions. The mystery is dissolved; the immigration officials have been reading Serge's "poetry."

AS THE TARIFF WORKS.

The the their string with the term of the returned to many of the statements given out by those importing interests of the East which A nosey old bird, probably, with would remove all protection from American industry. It will be remembered that prior to and a willingness to stop and exthe passage of the bili, these men said the plain it to the ultimate cackle to any one weak enough to listen. measure would add four billion dollars to the cost of living. As a matter of fact, the duty rates do not spell unressenable protection and when the foreign rates of exchange are taken into consideration, are not so high as those in previous Republican tariff bills.

An instance of how the bill works out is to be found in the fact one of the largest importers to be rewarded. . of toys and glassware is continuing to receive great shipments and to make satisfactory profits. The toys come from Germany and the rates on them were raised in the bill from 35 to 70 per cent. The importer says the advantage in exchange at the present time offsets the tariff increase and right there admits that without the advance in tariff the German toy would have been given an unusual and undeserved advantage over the American product.

The rate on glassware of the sort this firm imports is from 50 to 55 per cent. Under the Democratic law it was 45 per cent and under the Payne-Aldrich law 60 per cent. The present law is hallway between the two and despite the depreciation of exchange in Germany, Austria, Japan, Czechoslavia and France. What is said of these items applies practically to all of the imports covered in the new tariff law. Efforts of the importers and their Democratic representatives in Congress to make it appear the present law is prohibitive are being nullified by the official statistics.

THE BIG GAME.

The season of the "Big Game" is at hand. Already at Berkeley and Palo Alto the old graduates and former students are returning. THE TOTAL PROPERTY OF THE METERS OF THE METE crimson; men who feel conspicuous with so much as a carnation in their buttonholes take to huge chrysautheniums. The store windows of the college cities blossom out with partisan window trins and there is an air of hush and expectancy.

I ties. There is no penalty against hope, no In five years the value of the manufactured | brakes on the enthusiasm which sees always the chance the weaker team will stiffen in the great test.

Stanford and California will take the fields Saturday with the weight of responsibility and tradition upon their jerseyed shoulders. Each team, winner or loser, will play the game until the last minute, and each team, so long as it Oakland, 372.5 per cent; Los Angeles, 168.9 does this, will have the loyal support of its thousands of partisans.

It is bad enough to be forced to listen to some outside noise, rhythmic and persistent. But it is terrible indeed to have that noise in your head and never to be rid

Catarrhal involvement of the middle-ear is the chief cause of "head noises."

Whether catarrhal trouble will cause serious disturbance in the ears depends upon your particular anatomy.

One of the little bones of the ear is the stirrup-bone, so-called because it has the general shave of an iron saddle stirrup. The foot-place of this bone fits in a window in the skull. It plays back and forth in this window. But if the mucous membrane lining of the ear becomes thickened by catarrh, the free movement of the foot-plate of the stirrup-bone is interrupted. It may even become fixed in place.

IMAGINATION A CAUSE. If this fixation occurs when the foot-plate is pushed well into the bony window, there may be pressure on the fluids in the internal ear. When this occurs there are all sorts of subjective noises.

By "subjective noises" I mean that the patient imagines there are all sorts of noises. He hears them, but you and I cannot hear anything out of the ordinary. Such noises are all in the head, and do not come from the outside world.

Subjective noises increase in damp weather. If the patient takes cold they are worse. Indulgence in alcohol and certain drugs, like quinine, will aggravate them. Emotional excitement or hard mental work will make them worse They are always influenced by bad health, excessive fatigue or any unusual physical condition. The more nervous the individual the more he will suffer from head They are essentially a symptom

of middle-age or advanced years. Children never have head noises. It is rare to have any complaint while the victim is out-of-doors. At night or when in a quiet room they ere most noticed. Diversion and active work of some sort will cause them to be forgotten.

Associated with these subjective noises may be well-defined hallucinations. I recall a patient who told me he had a fairy in his ear. He said this fairy was always talking to him and directing good fairy and not an imp!

TREATMENT OFTEN SIMPLE. And you were sure she'd walked In the treatment of head noises the cause must, of course, be discovered. If this is found to be middle-ear trouble it must receive the careful attention of the ear

specialist. The primary trouble may be in the nose. If so, this must be given

Conference of Supervisors to Take Up Plan of State Organization; Hundred Here On Call of Wood

Organization of a body to be known as the Pacific Coast Music Supervisors Conference, which will meet in annual convention and merve to establish a closer relationship between the musical departments of various public schools throughout California, will be considered at a banquet of the supervisors tonight at the Key Route

More than 100 supervisors from all sections of the state, and musical directors of the State Teachers' college, called here by State Superintendent of Public Instruction Will C. Wood, are in the city of the new organization. Wood was requested by the state board to hold the music conference during the superintendents' conven-

According to Glenn Woods, director of music in the Oakland public schools, tonight's meeting will be of an informal nature, and probably will be followed by an election of officers and appointment of committees. He pointed out that the formation of the proposed conference would greatly add to the efficiency of musical training in California public helping factor into the various aupervisors.

California completed training for the big game with Stanford yesterday afternoon on their home lot. For these two days before the game, Thursday and Friday, rest will be the motto of the Bears. Nor will the Smith men leave their campus to get their minds off the impending conflict, according to word from Coach Andy Smith today who said that his men were in the best of shape and all that was required was a period of idleness to fit them to play the best game of the season. It has been feared by many that the Bears, having gone through a hard season and with eight men facing their last collegiate game, would fail to show to good advantage, possibly due to over-anxiousness.

A. We don't intend to get into any discussion as to what is tack-ling. Rule 21, Section 8 (a and b) clearly define what is considered illegal tackling. All that we care to say is that that we care to say is that tackling is stopping a man carrying the ball in some way other than is prohibited by these sections of the rules.

A. Yes. After a fair catch the

referee must ask the captain of the team making the catch what he cares to do. After the latter has made his decision, the referee blows his whistle, notifying both teams that play is about to comm nee. After that, the ball cannot touch the ground unless it is immediately kicked, provided that team making catch decided to try for goal from placement. California Possesses Edge in Kicking Dept.; Wilcox of Stanford Stands Third on Season's Record

By NORMAN C. RAAB

Punting is destined to play no small part in the annual Stanford-California big game at the Stanford Stadium Saturday. Andy Smith's eleven appears to possess an edge over the Cardinals in the various departments of play calculated to be sufficient enough to allow the Bears to roam at will over the Stanford gridiron and a statistical review of the play of the two rival teams throughout the season gives, at a glance, some comparative figures that appear to support the contentions of California supporters of the Blue and Gold supremacy. The first of these comparisons is based upon a review of the kicking done by the rival punters. Although California has one

season, the averages compiled are

all the more equalized, for in play-

ing an additional game, Califor-

(Continued From Yesterday.) THE WAY LUCK SERVED MADGE AND DICKY WELL,

I do not believe I ever have been more embarrassed than I was when the realization came to me that I had introduced Dick to Dr. McDor-mort as Mr. Craham, while the dapper little doctor knew me only as Mrs Black, the name I foolishly had put or the hotel register. My face felt as if it were being seared with flame, and I could only look helplessly at Dicky, hoping that in

some way he could straighten lt was not allogether a blind trust I reposed in Lan. Ever slace my wedding day I have recognized that one of my husband's pre-emi-

nent qualities is his social tact, his ability to handle any unusual situation graciously and delicately. And as I saw him, with no outward trace of emparrassment, advance to meet the round little physician with cordinly-extended hand, I gave a little inaudible sigh of relief. I knew that Dicky would manage in some way to extricate me from the humiliating predicament my foolish precaution against being followed by the mysterious elderly foreigner had brought upon me.
"I am more than glad to mee you, doctor," Dicky said heartily stressing the adverb and the pro-noun, "and I feel that we owe you

There was nothing in the physician's noncommittal professiona expression to indicate that he was doing anything else than listen con ventionally to Dicky's remarks, bu I caught a glimpse of his keen eyes as they glanced at me, then fixed themselves on Dicky again, and knew the little doctor was reading my husband and weighing what he reed carefully and judicially.

"Before that, however." Dicky went on, "do let me assure you how much I appreciate your care of

comment on the advancement of the human race in the year 1922 appeared recently: POLICE SEE PAPAS SPANK THEIR SONS.

Old Fashioned Ceremony at Station House.

PASADENA, Oct. 3.-Spanking with police sanction, also at police suggestion, has been given a successful tryout here as punishment for youthful

miscreants.

Four-boys ranging in age from 14 to 17 years amused themselves last night by throwing many business signs into the street. They were arrested. Their fathers were awakened and notified they could obtain their offspring by calling at the police station and identifying them. They called and were advised what their sons had done, and the suggestion was given that they take immediate action. Each father immediately delivered one old-fashioned spanking to one son."

And at once I hear countless satisfied clucks over "such good old-fashioned common sense." But was there common sense in such a method? Has there ever been any sense in spanking. or is it merely the sign of ignorance and brutality? Stop and think. Why did the boys throw down those signs? Because they thought and acted like little savages. Savages think and act from emotional motives. They are animated by love, hate, fear, desire, jealousy and other brute motives. Their passion, love, cruelty and fun is akin to that of animals. But civilized people use the other side of the brain-the thought side. They do not act on the first emotional impulse. They see the act in its relation to the lives of others and their own well-being and govern themselves accordingly. The end

How much did this spankingfest forward the processes of civilization? Did they meet savage impulse with intelligent discipline? No-they met savagery with more savagery. Also they met it with hideous injustice masquerading in the name of the law. Had those boys been a few years older the whole community would have been horrified at the idea that men were invited in to "beat them up."

UNCLE WIGGILY'S SKATES

It was the Woozie Wolf.

INCLE WIGGILY, you had better put on your warm clothes this morning!" called Nurse Jane Fuzzy Wuzzy in the hollow stump bungalow, just before she told the bunny gentleman that breakfast

was ready.
"Put on my warm clotheswhy?" asked Uncle Wiggily. "Because it's very cold-freezing!" answered the muskrat lady. 'Good!" cried Mr. Longears. "We'll have snow and ice for

And when the bunny gentlenun had eaten some carrot pan-cakes with maple sugar sprinkled around the edges, he looked in the glass to see if his pink nose was twinkling properly and then he looked for his skates.

He had not used them since the winter before, and they were a little dull and rusty. But Uncle Wiggily soon had them polished and sharp, and, slinging them over his back, Uncle Wiggily started to hop away from his "Where are you going?" asked

Nurse Jane. "I am going to look for a place tall going to look to a place to skate, and maybe I will have an adventure," answered the bunny uncle. "Perhaps I'll have both."

"Well, don't fall down and bump your nose," said Nurse Jane with a laugh as she began

to wash the dishes. Uncle Wiggily hopped through the cold woods and over the cold fields until he reached a pond of water. That is it had been a pend of water in the summer, but now, when it was almost

Thanksgiving, the pond of water was frozen into ice.
"Harray!" cried Uncle Wiggily. "Here's a place to skate!" He sad down, fastened his Ekaics on his paws, and then began to glide over the frozen pond.

Uncle Wiggily was just wishing Uncle Butier, the goat, or Mr. Whitewash, the polar bear gentleman, would come along to skate with him when, all of a sudden there was a cracking in the bushes at the side of the "Hello!" said Uncle Wiggily to

himself as he heard the noise. "Some one is coming now!" And some one came, but it was no one the bunny wanted to see, for it was the Woozie Wolf!

"What are you doing here?" growled the Wolf, "I am skating," answered Uncle Wiggily. The burny did not need to ask what the Wolf

was doing, or going to do. Well he bunny knew that the Wolf tied to nibble cars.

As Uncle Wiggily sat down to take off his skates he had an idea. If he could only get the Wolf to put on skates, the Wolf, not knowing how to glide on them. would slip and stumble and fall -just as Uncle Wiggily himself had done when first he learned to skate. So when he had his skates off, the rabbit said: Wouldn't you like to skate, Mr. Wolf? You could go very fast, and catch any one you

wished to nibble. Try my skates." "Good!" howled the Wolf, "Give me your skates!" Uncle Wiggily gave the Wolf the skates, and helped the bad-

chap fasten them on his paws. "What do I do next?" asked Wolf.

"Stand up," said the bunny. But no sooner had the Wolf stood up on the skates, then down be fell, ker-bunko, smaking his nose, bing-bang!

"Oh, what terrible skates!" cried the Wolf. He got up only to fall down again! Once more he stood up, but he smacked his nose again. "Oh, wow! Take your old skates!" he cried to Uncle Wiggily, kicking them off. "I've had enough! Now I've got nose mended! Oh, double wow!" And away he ran, not nibbling

the bunny's ears at all.
"Well, I had a good skate and also an adventure," laughed the rabbit, as he skuted over to Grandon Goosey Gander's house. And if the tea kettle sings the

A girl with a hat tipped too far in front and with a waist which made poor protence of meeting skirt band, passed Art's table. He looked up, his eyes narrowing under the visor of his cap, then reached out and seized her by the arm. The girl cried out as his grip tightened and he rose, swinging her around,

"We're goin' to dance," said Art Frayne. The place was quiet. Everyone was watching the two.

This young husband whose whose wife was waiting in the little room had made himself the central figure in the life of the grimy cafe. "I can't stand it any longer, Art," she said, "You don't knew the things I imagine while you are gone. And you always return smelling of smoke. You must tell me where you have been or I cannot go on trusting you."

Art thought of where he had been and smiled. "It is over now," he answered, "We have enough money for the fare home and we'll start." "But how did you get it? I will not use any of it if it is not honest."

Coach Kerr Practically Selects Lineup For Game With Bruins.

By TOM IRWIN. STANFORD UNIVERSITY, Nov. 23.—A year ago tonight Joe Fitzgerald, then backfield coach of the Stanford varsity and 1920 quarter-back of the Harvard eleven, walked out onto the speaker's platform at the annual Big Game rally and threw consternation into the collegiate ranks by asserting that Stanford had not one chance in a thousand to win. The dis-mayed students muttered among themselves and wondered what had got into Joe. Never before has a Stanford coach, player, or student admitted defeat before the game. But Joe was right, Ftanford lost.

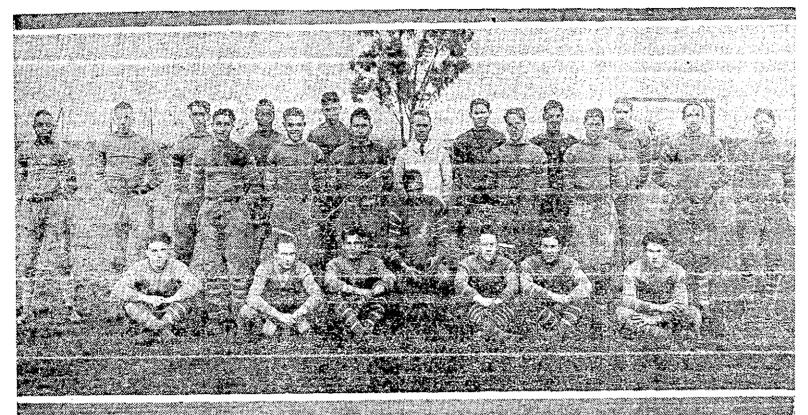

Here was the chief reason Fitzgerald gave for his prediction. "You have only eleven men," he declared. "Eleven good, ordinary football players, none of them stars. few of them experienced, but all of them willing to play their best in this game. If one of them is hurt, the whole team is put on the rocks. But above all it is lack of competi tion for places on the team that will give Stanford the short end of the score tomorrow. These eleven men of whom I have just spoken, have not had to fight for their places. And no football team can give more in a game, whether it wants to or not, than it gave in practice. There has been nobody to take their places away from them if they loafed and consequently they are in no shape to

High School Elevens Meet Lomorrow

Oakland, Technical Teams Will Battle At California Field.

When Tech and Oakland High 3 o'clock on California Field, there will be a fight between two teams equally matched in backfield and line. Both elevens will play for the breaks, realizing the fact that a recovered fumble or a blocked kick may, and probably will result in the only score of the day, and the championship of the Oakland Athletic League.

Since the beginning of the season, the Tech Bulldogs have played ten different teams, and have beaten eight of them. The Oakland Acorns have won nine games and lost two. Tech has rolled up 217 points against its opponents' 57, while the Oakland team, playing against stronger opponents, has totaled 189 points against 82 scored on it.

The Purple and Gold line-up will be considerably changed when the teams go into action tomorrow. Clyde Raphael, who has been playing right tackle, will start at left guard. Captain Louis Byers. who was one of the best tackles in the O. A. L. last year, will be shifted from halfback, which has been his regular position this year, to right tackle. Lane Fechter, star end, will be unable to play on account of a recent illness, and Petray will start at right end. TECH HAS EXPERIENCE.

State School Chief Also Says the Cost of Living Will Not Beeline

Lower tares or a reduced cost of living will not come in the immediate future, nor should they be expected by the people, Will C. Wood, state superintendent of public instruction, declared yesterday in an address before members of the Lions Club at their luncheon at the Hotel Oakland.

"We are row in the cold, grav morning after the war," Wood told his audience. Taxes in the fu-ture will not be as low as they were before the war and we cannot expect it. We must pay our debts and loans We have a debt of between \$400 000,000 and \$500,-600,000 each year as a result of debts to the men who went over-seas and fought will increase."
Wood spoke on "What Our Echools Cost and Why." the war, nd as time goes or our

He declared that the cost education is borne sconer or 'afer, education is borne sconer or [201], by the taxpayer and that efficient school methods are cheaper and more satisfactory than education by apprenticeship. The taxpayer, he said, is more willing to pay for education under its true name than education under its true name than to be compelled to pay expert wages for labor performed by those learning a trade.

SCHOOD COSTS GROW.

Taxes are necessarily higher for education than they were years ago when purely academic subjects formed the basis of a school course for the expansion of the scope of learning in schools and the enorm ous increase in enrollment of Cali-

HIGH SCHOOD GROWTH.

This state had only thirty-five high schools forty years ago, according to statistics presented by Wood, with a total enrollment of less than 700 pupils. He stated that unless b grer standards of education had been introduced in the intervening period private edu-cational institutions would be allowed to flourish in this state as they have in many other localities, principally in the East, because parents refused to continue to send their children where practical edu-cation was not obtainable

cording to announcement from the Sweden, 100 kroner ...... 18 68 California and Hawailan Sugar Re- Syria, 11 sterling ........ 4.52 pounds, instead of \$7.40 today. The ian sugar market in the east bus been gradually strengthening for several days, and an advance on the coast has been expected by hijobbers for the past week, Raw sugar sold today in New York at refiner's base at 3%c.

New erop oranges have taken a bis slump. Sunkist foncy navels are quoted wholesale today in Oakland at \$5 to \$5 50 per box, against \$6.50 to \$7 yesterday. This new Holl rrice, it is understood, was made 39.45 by the carrus procedure for the first few cars of fruit only, which are Elways s'ow to sell because of an impressison that they are picked too green for good flavor. Arrivals today included two cars

of spuds, one car of apples and one car of grames. The last named is not welcome. The distributors are anvious to see grapes disappear. The quality of what is being daily is aany below par, And the shipments are acting to con inue the congestion of the market in certain channels.

Because, whereas formerly the company had a surplus from which to pay dividends, that part of the surplus which is capitalized has become unavailable for eash dividends. The imaginative mind of the public, however, generally takes it for granted that the same dividend rate will continue to be paid, if not an increased rate. Manifestly, with a larger outstanding stock the same dividend rate cannot be maintained as on the smaller capitalization.

The reason attributed by financial writers and those advanced by the companies declaring stock dividends are not the only one which figure in the "stock-dividend spree" in which most of our big corporations seem to be indulging, says Max Rolnik, in The Magazine of Wall Street. Rolnik is a former deputy collector of internal revenue. Some of his remarks follow:

"By the distribution of dividends in this manner, the surplus is rein this manner, the surplus is re-American Linseed, Hide and Leather duced and the possibility for deplet-preferred, Woolworth and Pacific

therefore, is no longer available for cash dividends. Where the surplus has been used in building up the covering and induced buying based physical assets of the company and is not available in cash to distribute as dividends, the plan of issuing stock dividends in the most practicable solution for the company.

BENEFIT TO COMPANY.

Consolidated Gas made a new high on the recovery at 125½ on short covering and induced buying based on the belief that a \$5 annual dividend will be established on the new stock.

Continental Can held around the year's high on expectation of a thirty per cent stock dividend.

"For this reason, too, a company's credit is improved when its surplus is capitalized. The surplus that has been transferred into the capitalization has become a firm investment, leaving the company in a stronger financial position than it would have been in if it had had to make an equal disbursement in cash.

"As to the effect on stockholders in cash or a distribution of dividends in stock: Theorically, the stockholder is made no richer or upporer. Of course, he may be able to sell his stock at higher prices later on, but that is a matter for market activities and the luture of the business to decide. It does not alter the fact that after a stock dividend distribution each stockholder merely gets an additional number of shares, but, in substance, lie still being traded in for actual delivery were also in supply at concession. Battleships of the Pacific fleet are now engaged in gunnery exercises off Los Angeles. Changes in docking and overhauling schedules have been made to conform to the plans for the joint maneuvers. The battleship Pennsylvania, originally not scheduled for overhaul until early in 1623, will sail for the Puget Sound after completion of gunnery exercises December 13. She will return here in January. The Texas will not accompany the fleet south. The San Francisco Disgorging Iron and Clay Onto Quay Wall.

Pig Iron and fire clay are being dumped into the quay wall in large quantities from the holds of the Swedish motorship San Francisco which arrived yesterday from Europe on her first trip to Oak-The big freighter, registered at 6500 tons net, has been a frequent visitor to San Francisco, her namesake city, ever since 1915. when she made her maiden run to the Exposition.: This is the first time, however, that she has brought cargo direct to Oakland for discharge. The iron, weighing 3000 tons, is from Sweden and the clay, weighing 1000 tons, is from Holland. In addition, the steamer also is putting ashore a quantity of miscellaneous material.

The San Francisco is not the only steamer of large sea-going register that has found it expedient to make Oakland a port of call this year. In fact, it is becoming a habit with most of the big Atlantic and European lines to send their boats direct to this side of the bay to take on cargo instead of lying alongside a west shore dock until the goods can be lightered across the bay. The new departure insures much quicker and better delivery of cargo aboard the vessels. The latter have no trouble either in negotiating the channel of the estuary or in coming into the outer harbor wharves.

# PACIFIC TRADE

New Service Definitely Announced By Wm, Campion, Confirms Rumors.

NEW YORK, Nov. 23 .- The big fleet of American flag freight steamships now engaged in the coast-to-coast-Panama canal service, totaling more than 700,000 tons, is to be increased next month by the Garland Steamship Corpora-

William Campion, vice president and general manager of the line. today announced that late in December his company will put into the coast-to-coast trade its entire fleet of seven modern freighters aggregating more than 59,000 tons. Ports of call on the Atlantic will be New York, Baltimore and Norfolk, and on the Pacific, San Franeisco, Los Angeles, Seattle and Portland.

Advent of the Garland line to the intercoastal trade will make a total of 112 companies engaged in this service.

Tax on Curing Salt
For Fish Remitted

WASHINGTON, Nov. 23. - The treasury has approved regulations remitting the duty on salt when it is imported for the purpose of curing fish transported into American ports in ships of United States reg-istry. The new regulations were promulgated in accordance with the provisions of the Fordney-McCumber tariff bill in section 313, which were designed to favor the American iisheries and American fishing craft The bill sets forth:

"Imported salt in bond may be used in curing fish taken by ves-sels licensed to engage in the fish-cries and in curing fish on the shores of the navigable waters of the United States under such regulations as the Secretary of the Treasury shall prescribe; and upon roof that the salt has been used for either of the purposes stated in this provise, the duties of the same shall be remitted: Provided, further, that the exportation of meats, whether packed or smoked, which porten aurit and proceeding to with imported salt there shall be By authority of the Commissioner refunded from the treasury upon satisfactory proof, under such regulations as the Secretary of the Superintendent of Lighthouses. ### Lockout Threatens N. Y. Building Tie-up

NEW YORK, Nov. 23,-The fight between mason builders and bricklayers ever employment of hod carriers and laborers affiliated. with the Independent Laborers' Union sponsored by Robert F. Brindell, imprisoned labor leader, last night neared a crisis which threatens a complete tie-up of the EMINENT SIR R. C. FRANKE, Jr. building trades in New York City next week.

Heads of unions that have put a ban on new work in protest against the Brindell workers have been given until Monday by the employers to lift it under penalty of a lockout. The International Bricklayers' Union, affiliated with the American Federation of Labor, is taking the side of the International Hod Carriers' and Common Laborers' Union. It is estimated that from \$75,000.000 to \$100.000.-000 in new construction would be affected.

NOTE: These Foreman & Clark prices are guaranteed prices. They do not fluctuate or vary. They are never boosted up or marked down. They will be the same next January as they are today. You do not have to WAIT for rock-bottom prices at Foreman & Clark. We give every man the same treatment and value whether he buys at the beginning of the season or the end. That's our idea of fair play.

REMEMBER, your satisfaction here comes not only from the saving that you earn. Foreman & Clark believe that selling a man a suit or an overcoat is a personal transaction. That garment goes on your back, lives with you, works with you, plays with you... and we are personally interested in it during its entire life. Our guarantee goes with it... good at any store at any time... and every resource of this big \$10,000,000.00 business stands back of it...

bers of the clothing industry names. But we disagree with their methods. When everybody thought clothes should be sold downstairs, we started selling them upstairs, and kept on doing so until now we save the public \$497,568 yearly in rent alone.

When everybody thought the jobber and the maker were entitled to their profit on clothes, we decided the public was entitled to it instead, so we built our own factories, operating at cost.

And now, when everybody in the manufacturing end of the clothing industry decided to omit the inside construction in overcoats and even in suits this fall and winter, to build their garments without the vital backbone of st

without the vital backbone of style and shape . . . . again we disagreed.

You can find plenty of overcoats this season without linings, without trimmings, without inner shape or anchored style . . . with nothing but a flimsy strip of canvas to hold the front of the coat in shape. Remember, these have been built for one reason only . . . to cheapen the price.

There is no other excuse.

Men are buying Foreman & Clark From a \$310 start we garments on a different basis. We have not produced a single suit for fall have won 500,000 or winter without every detail of our customers, held over guaranteed construction in it! Every bit of style is anchored to the inside 83% of them, added front. Every part of the garment is 100,000 in 1921 and built for permanent shape. ARE adding 200,000 And now the overcoats! We have taken a new and remarkable step. We in 1922! Our \$10,have literally transplanted our inner 000,000.00 annual suit fronts into our overcoals.
